

Travel during the coronavirus pandemic – our checklist for you

Before setting off

What do I have to take care of before I travel?

Please find out the coronavirus regulations at your destination. The most important points to consider:

- What are the formal requirements for arriving/entering the country?
Do I need to fill in forms or install an app?
- What sort of coronavirus test do you need to enter the country, and how recent must it be?
- What are the quarantine rules?
- If you have already been vaccinated or have recovered from coronavirus, what documentation do you need to prove this?

Up-to-date information is available from the [Federal Foreign Office](#).

Book a parking space

Reserve a parking space at hamburg-airport.de so that you can have a relaxed start to your vacation.

At the airport

Masks are compulsory

It is still compulsory to wear a surgical or FFP2 face mask in the terminals at Hamburg Airport and when using public transport.

Hand hygiene and social distancing rules

You will find dispensers for hand disinfectant in many locations in the terminals and on the Passenger Pier as well as in all lavatory/bathroom facilities. Please ensure that you maintain a minimum distance of 1.5 meters between you and other passengers at the airport, even at the security checkpoint, when waiting at the departure gate, and during boarding. The distance markings on the floor will help you with this.

Travel documents and check-in

For non-contact check-in, you can use your airline's mobile check-in facilities as well as the fully automated check-in and self bag drop kiosks. Various airlines also offer late night check-in. To keep waiting times as short as possible, we request that you have your travel documents handy at all times (passport or ID, boarding pass, and, where appropriate, vaccination certificate, corona test results, and entry form for your destination).

Cabin baggage and security checks

If at all possible, please bring only one item of cabin baggage to the security checkpoint, and pay attention to social distancing. Remove larger electronic items and your 1-liter bag for liquids from your cabin baggage before reaching the security checkpoint. Find out about the current rules for aviation security checks at bundespolizei.de.

Before coming back

What do I have to attend to before returning to Germany?

• Registration of entry:

Before returning to Germany from a high risk or virus variant area, you must register online at einreiseanmeldung.de. You will need to have the confirmation of registration in electronic form (PDF) or on paper when you enter the country.

• Mandatory tests for all arrivals

Any person wishing to travel to Germany by plane must present either a negative coronavirus test result or proof of vaccination or recovery to the airline before departure.

• Quarantine

Persons arriving from from high risk areas and virus variant areas must enter home-based self-quarantine for up to 14 days immediately after entering the country. The quarantine period may be reduced, subject to specific requirements:

- Persons who have spent time in a **high risk area** are subject to quarantine for 10 days. This may be reduced on the basis of a negative result to a test conducted five days after entering the country. In the case of children under the age of 12, the quarantine automatically ends at the end of the fifth day after entry.
- Persons who have spent time in a **virus variant area** are subject to quarantine for 14 days. There are no provisions for early release from quarantine, not even for vaccinated or recovered persons.

An overview of all high risk areas and virus variant areas, along with current quarantine regulations and exemptions, may be found at: rki.de/risikogebiete

Complete information on travelling safely from Hamburg Airport and the measures adopted by Hamburg Airport and the Airlines can be found online at hamburg-airport.de/corona

We wish you a pleasant
and safe flight
